

YOUR GUUGU IN NUMBULWAR

Your water is
safe to drink

Chlorine is
added to
remove germs

Your water is
tested regularly

Water quality
reports are online

WHERE DOES YOUR WATER COME FROM?

Your water comes from
underground (bore water).
It has many natural
minerals from the
surrounding rock.

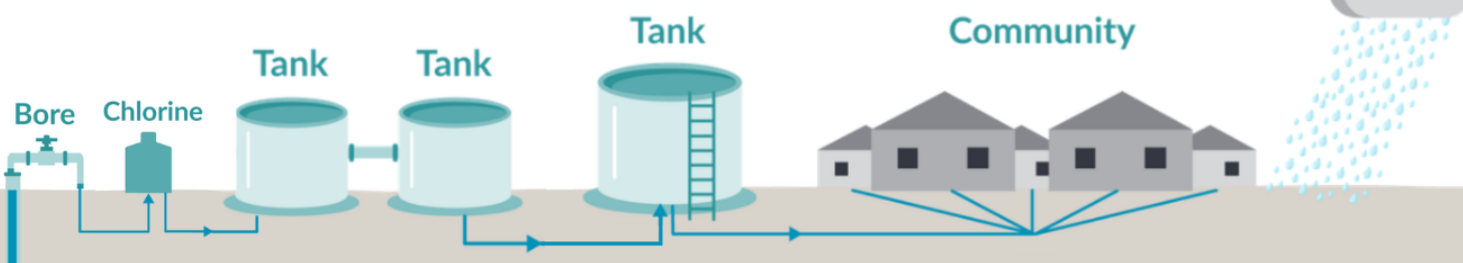

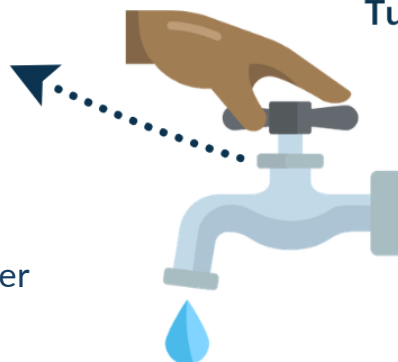

This is normal.
Your water is safe to drink.

YOUR WATER MIGHT:

- Look a little dirty from the natural minerals
- Leave white marks on kettles or taps
- Make soap difficult to lather

Your water is precious.
Turn off taps and
report leaks.
